

RP DELTA FX Series Dune/Desert Tires

Dunes or desert, DELTA FX off-road tires
will get you there fast!

RP DELTA FX 27-INCH 4-PLY RATED SXS UTV OFF-ROAD TIRE

The **RP DELTA FX Tires** are engineered for **current high horsepower UTV** and **SXS vehicles** such as the Can-Am Maverick and Commander. The innovative staggered low profile paddle and centralized blade design allows for high flotation and movement on hard-pack surfaces with exceptional sand traction while minimizing blade wear. The 27x10x14 and 27x13x14 sizes make this a perfect solution for your sand excursions on most UTV and SXS platforms.

- Durable 4-PLY rated nylon cord construction
- 27-Inch height mounted
- Extra wide 5/8" center directional rib
- 24 tapered 5/8" reinforced directional paddles
- Staggered paddle design
- Tire weights: 27x10x14 22.3 lbs
27x13x14 24.6 lbs

RP DELTA FX Series Dune/Desert Tires

- Five key factors evenly contributed to the development of DELTA FX: Durability, cost, traction, flotation and environment.
- The DELTA FX is made from a rugged 4-PLY rated (versus common 2- and 4-PLY rated paddle tires) hybrid bias/radial nylon cord construction to minimize sidewall flex collapse as well as offer increased resistance to external penetration.
- The unique staggered paddle low profile design with extra wide center rib makes this a unique combination desert/sand dunes tire.
- The reinforced paddles and center rib also protect the paddles from premature wear and tear when having to traverse blacktop and hard pack to get back to base camp.

- The directional tapered design of the paddles moves sand very effectively while the center rib minimizes flex and offers exceptional directional stability. The wide patch and lower profile paddle enhance flotation to allow better paddle hook-up.

APPLICATION:

- Designed as a combination desert and sand tire, the DELTA FX is a favorite choice of high horsepower, big displacement UTV and SXS's.
- Using the 27x10x14 DELTA FX up front and complimenting them with the wider 27x13x14 DELTA FX tires in the rear makes for a highly mobile and fast response vehicle.
- Recommended wheel sizes are 7 to 10" with 14" diameter.
